

UTI Program

Appendix F: Implementation Steps and Core Strategies

This is an excerpt from the Urinary Tract Infection (UTI) Program: [Implementation Guide \(Appendix F\)](#). This resource identifies the UTI Program implementation steps and core strategies. It can be used by your implementation team as you work through the planning phase of the UTI Program, to ensure that you address each step. This can also be used as a quick reference sheet for the UTI Program steps and strategies.

UTI Program implementation strategies
Increase buy-in and support
<input type="checkbox"/> Strategy A: Involve local influencers
<input type="checkbox"/> Strategy B: Generate buy-in
<input type="checkbox"/> Strategy C: Align policy and procedures to reflect practice changes
<input type="checkbox"/> Strategy D: Review how resident symptoms are documented and communicated
